

Hello, dear diary!

I'm totally in love and want to show everyone how crazy I am, but I'd rather not. (Just kidding). In real life, I'm actually someone who is very reserved and doesn't write so many stupid things. I come from Germany and this is me and the text about me. I don't really have anything on my mind and I don't really want to get in touch with anyone. That's why I built a website that doesn't kick me! I always get kicked anyway. My real name is Christian Bayern, from Germany near Offenburg. But if nobody minds, I'd rather remain anonymous. I have a lot of fun in my life and talk to everyone all day long. And I don't have any other delusions than what I've just written. The world means a lot to me and my internet website world is fine for me personally, too. I'm 43 years old now and I still don't have any say here. I don't have any money, just like I don't have any freedom. Actually, I am not responsible for this website, it manages itself. I am mentally disturbed and severely handicapped: so be careful what you read, or rather, I write to the website, especially because it deals with my little problem and my problem that only exists in my head; but which unfortunately talks all day long or turns women on. Actually, I am very unpopular, especially with women, because they think they cannot deal with me because of their perversion. I can with them, but not every time and not every day, at least in theory. In practice, I have a lot of friends and get on well with everyone, but I have my own world and diving into virtual worlds. I take my website very seriously and will help everyone with my texts and articles. What do I have to say about myself? I am male. I am stupid and I am a pig. I am actually entirely responsible for this text, which I am just making up, because it is actually a PDF with which I am now creating a language for words while I am reducing them. But actually I want to do everything right for everyone and I don't have any other problems. I am responsible for my own life and I even cook for myself, aha? So what else can I say? Everyone should be happy in my own way and I hope everyone here enjoys my articles, or their life, or what has become of it, but I also hope they have a lot of luck without any problems in the actual natural and human world. This website is written completely without intervention, i.e. no technologies are used that pose a risk or would result in changes in hyperspace. I also haven't incorporated any DNA or anything else, or we aren't responsible for that. If someone farts and then thinks we wrote something wrong, because what I have written is only for me to like. If you like it, I'm very happy about it and you can talk to me about it. Ah, I forgot. I'm single. If it's not a problem, then you can read everything, at least as far as you can get from the 1.6 million words, and I hope you enjoy it and get well. I actually wanted to study medicine? But that didn't work out. Instead, I'm sick and locked up as a mental health professional. I'm a normal person in this world, and I even have different thoughts than normal people. I'm also very good at work, and I'm always in a good mood. So I just hope you understand, I hope you enjoy it, Sayonara Christian Bayer. Administrator of these texts and website.

References on My Personal Homepage

Over my 22-year journey with technology, I have explored and used a wide array of digital tools, apps, and services that have enriched my personal, professional, and creative pursuits.

This section provides a deep dive into the ecosystem of apps and services that power my everyday life.

Development & Web Design

- [W3Schools & W3C Validation](#): Essential HTML and CSS.
- [CSS Tools](#): Get the code for your work readable better.
- [Colorlovers](#): Color palettes and Hexcodes.
- [Balthisar Tidy](#): HTML tidy.
- [Favicon Generators](#): Favicon.
- [Image Compression](#): With TinyPNG.

Creative Software & Design Tools

- [Adobe Suite \(Photoshop, Dreamweaver\)](#): Industry-standard tools for web design.
- [BBEdit & Notepad++](#): Coding app on macOS, while Notepad++ is a staple on Windows.
- [Sketchbook](#): Paired with my stylus for digital art.
- [ClipFish Pro](#): Video editing on mobile.
- [GIMP](#): Free, open-source photo editor.
- [SiteSucker](#): Downloading entire websites for backup.

Productivity & Security Tools

- [1Password](#): Password Safe.
- [Spark](#): An email app with advanced features.
- [Synology NAS](#): My Network-attached storage solution.
- [Pushover](#): Push notifications.
- [AdGuard](#): Online protection.
- [1.1.1.1 by Cloudflare](#): DNS.
- [Integrity Pro & SEO Spider](#): SEO optimization.

Social Media & Communication

- [Facebook, X \(Twitter\), Instagram](#): Social media platforms.
- [Reddit](#): For niche discussions, resources, and entertainment.
- [LinkedIn](#): My go-to for professional networking and job insights.
- [Pushover](#): Visitors push notifications PHP.

Artistic & Creative Tools

- [MagicPoser](#): For creating 3D models.
- [Neuroflash](#): Unique tool for writing poetry text.
- [Perfect365](#): For a polished look.
- [Photo Lab](#): Known for its fun photo effects.

Music & Multimedia

- [djay Pro](#): For music mixing and DJ experiences.
- [VLC Player](#): Different file types.
- [YouTube](#): Videos, Ads.
- [Logitech Harmony Remote](#): A universal remote.

Smart Home & IoT

- [SmartThings](#): Home automation.
- [HomeCoach](#), [WIZ](#), [Withings](#): Home and health.

Health, Fitness & Wellness

- [Mighty Fight Sport App](#): Home Coaching.
- [Withings](#): Health monitoring.
- [Oral-B Smart Toothbrush](#): Ai smart technology.
- [Sleepwatch](#): Tracking with Apple Watch.

Knowledge & Information

- [Wolfram Alpha](#): For in-depth knowledge and data insights.
- [DeepL Translator](#): Tanslations.
- [dict.cc](#): My dictionary.
- [Wikipedia & Google Translate](#): Translater.

VPN & Security Services

- [OVPN & Cloudflare](#): VPN services.
- [Zonealarm](#), [NordVPN](#), [CyberGhost](#): VPN.

Data & Web Management

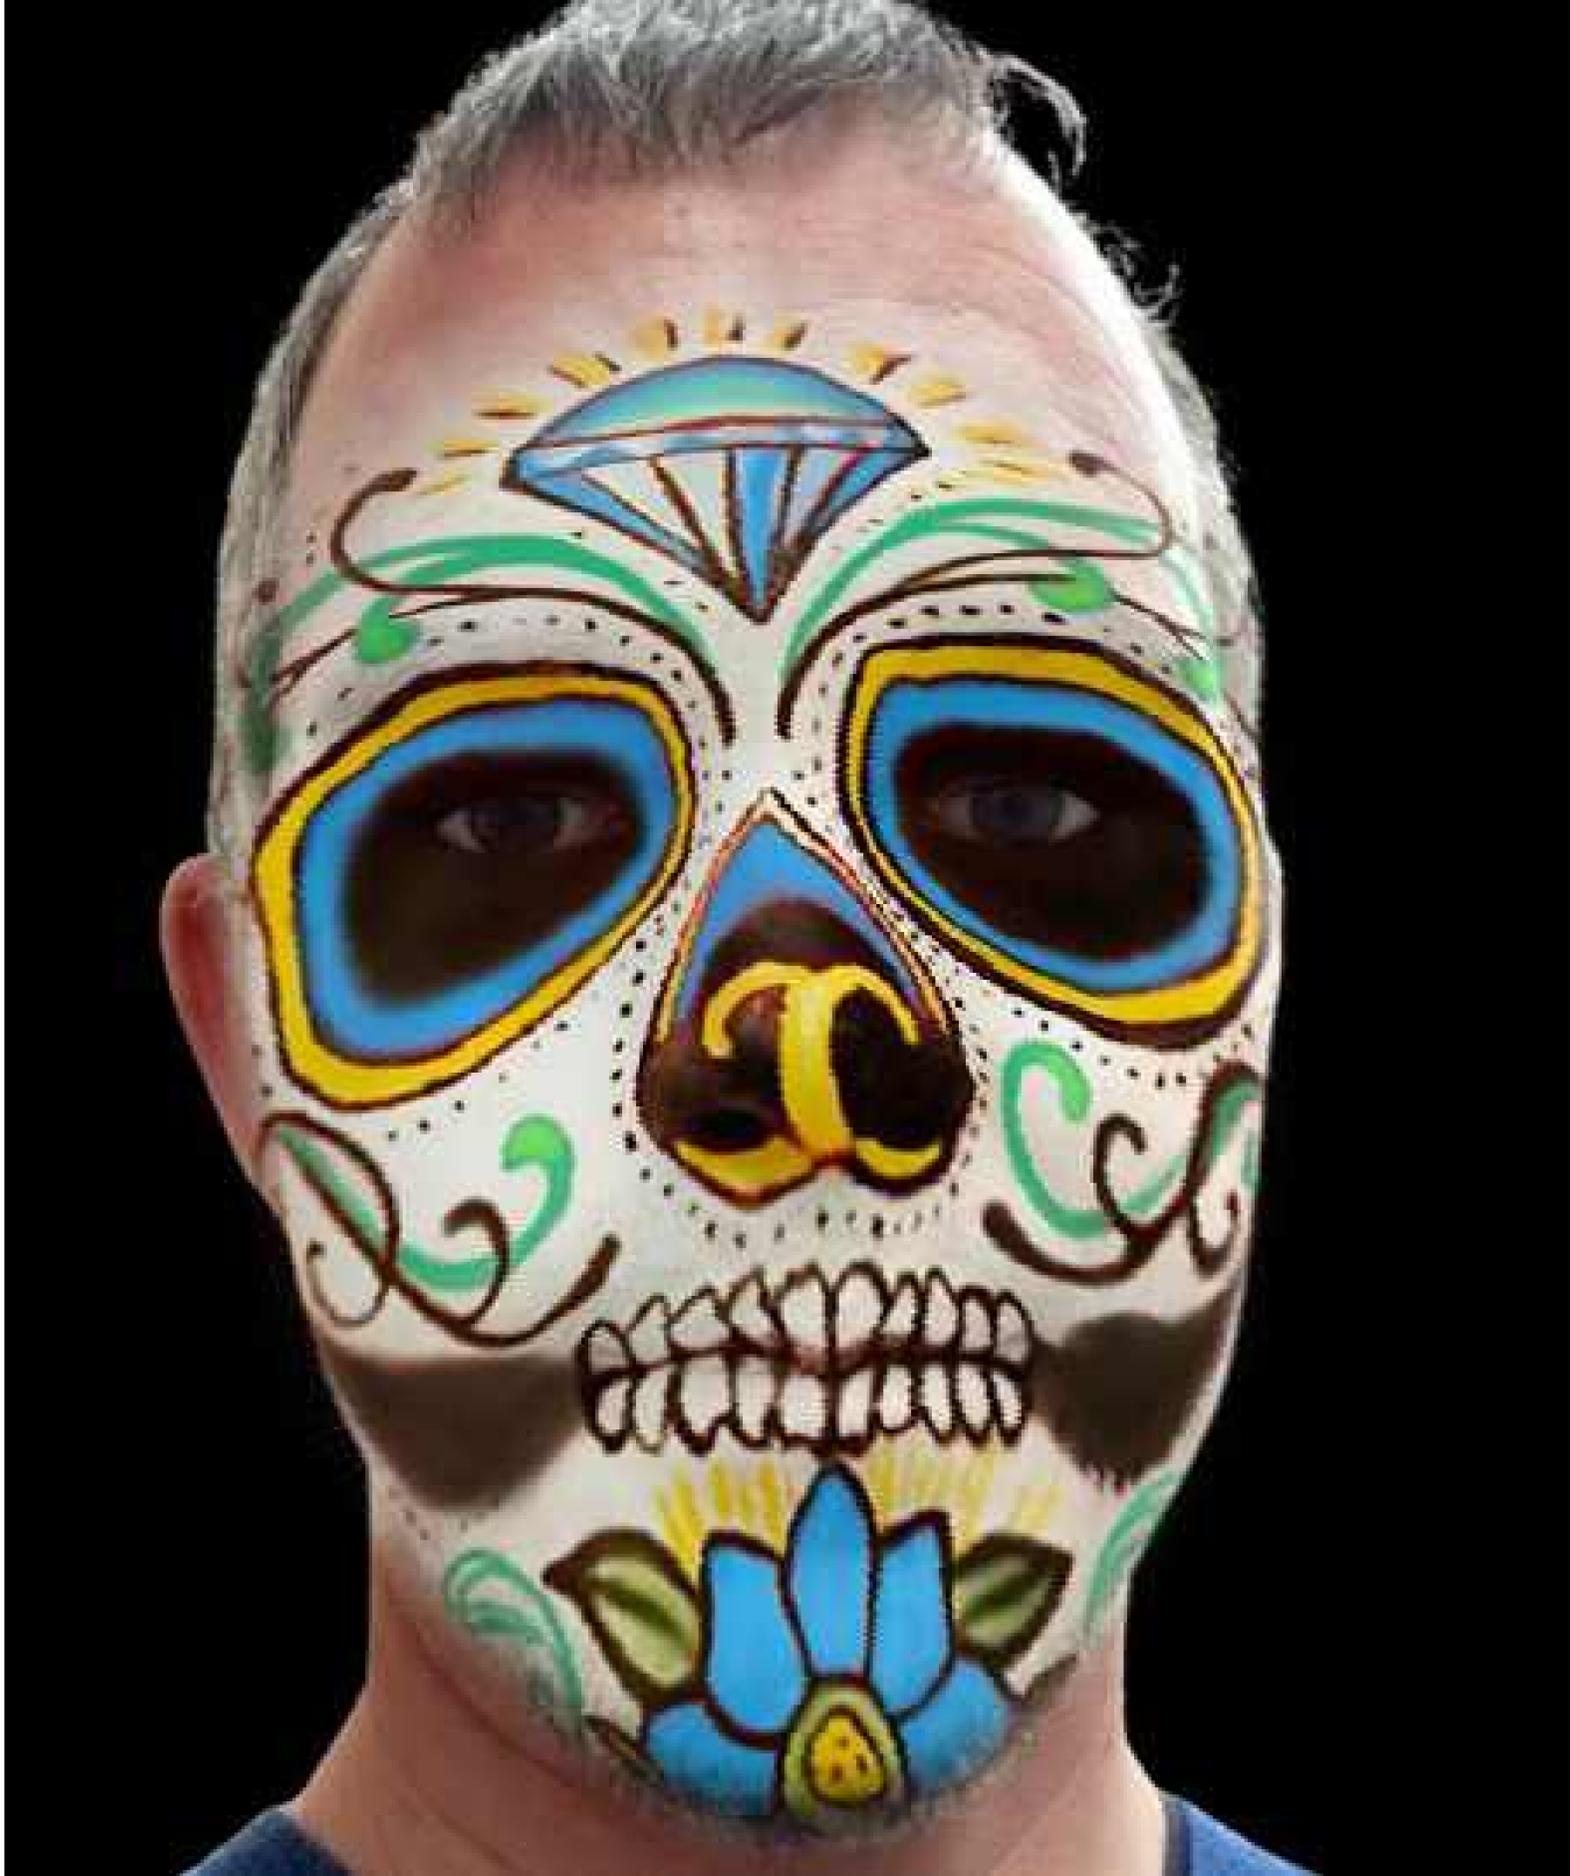

- [Transmit](#): FTP Manager.
- [Httrack](#): Website backups.
- [Strato & Seobility](#): Good things.
- [TrafficSeeker](#): Website submissions and traffic generation.
- [Google Search Console](#): Google presence SEO.

Archived Services & Tools

- [DomCop & ExpiredDomains](#): For domain acquisition.
- [Dropbox & Evernote](#): Cloud storage and organization.
- [Buffer](#), [Hootsuite](#): Social media poster.
- [Zonealarm & dnsomatic](#): Security for web protection.
- [Integromat & Zapier](#): Automated workflows.
- [ICQ & Foursquare](#): Platforms for messaging.

This extensive set of tools and services has supported my journey, allowing me to explore, create, secure, and connect in a digital world that constantly evolves.

Each app and service marks a step forward, whether in productivity, creativity, or connectivity.

Work certificate in reality / suggestion:

If I'm not running around with a machine gun all day in the military, I can actually shine with medical technology articles and I haven't actually studied anywhere, but everywhere, internationally, super internationally at the highest school in the world. I mean life! Otherwise I'm a well-known nutcase in the police and I don't really have anything in my head but I can do stupid things and have already convinced eight companies not to notice me at all. I get along really well with my DNA, at least at night, and during the day with a nutcase talent that has a lot of unemployed people and I'm actually good for nothing unless I'm managing millions or billions, which I do all day. Actually, I don't really want to talk about everything now, he said about shares. I've already been through everything up to being a lawyer, at least in my dreams. Actually, I'm not very compatible with anyone either, but service and other things come very easily to me. I am a great professional specialist in word searches and anagrams, but I can hardly do math, and I can also do metaphysics. For me personally, life is fun and games, and I always prescribe myself the best drugs from the drugstore. Otherwise, of course, I can't mention everything here! But I can mention a few things, see politics in the United States, Israel, and Ukraine. Besides that, I basically do what I feel like doing. Nothing all day. Investor, media relations, internet, press, and that all day long. Normally I don't work at all and I just rest for about 15 hours a day. I can't sleep at all, especially during the day. Actually, I also do medical doctor work and psychiatric care and neurosurgery in the hospital. Everyone already knows my favorite nickname. I don't earn anything from it, but I have a billion problems every year. Actually, I have problems with everyone because I'm constantly getting into trouble and then shooting around with machine guns. Or handguns, not hard ones, or any weapons like rockets or airplanes. For me personally, that's no problem at all because I'll just survive. At some point I'll be dead, but then it would have been the fault of people I know personally and not from the street. I've got about 80 driving licenses. And I've got 124 black belts in 320 martial arts, so if you want to mess with me, write me a sick note! Otherwise I like going to China because I've always been famous. Otherwise I just fly around the world 20 times a year. It doesn't matter how I get through. I've been to the North Pole, at least my own. Otherwise I look after people all over the world, especially in crisis areas and the desert. And actually other situations and things too. So far so good, have fun with my text. Don't work so much, I won't. Of course, that was just an excerpt from my 80 different jobs. I'm a dreamer and a failure, so do what you want! Your Chris.
